Project Milestone 3
(Visify)

Team Member Names: Tyler Huynh, Brady Stark, Spencer Huey, Andy Strong, Ben Niesmertelny

Features Completed
- Login page, home page, account page, forum page, and part of the database
- The server.

Working Features during the demo:
- The login page, home page, account page, forum page, and the backend associated with the various pages all worked.
- The account page database worked as well.
- The linking of the pages worked as well

Issues faced (development or demo):
- For the login page, the only issue I faced was making the background a gif and other styling things. (Tyler)
- Hard to open the forum page and the styling for the forum page was not there.

Suggestions from TA:
- Make the website more uniform in design across all the different pages.
- Just work on the overall website more and refine it.

Individual Contributions:
- Tyler: Created the login page and part of the account page and sent it off to Andy for the backend.
- Brady: Created the forum and thread pages.
- Spencer: Created the home page.
- Ben: Created the server and linked the pages together.
- Andy: Created the database and backend for the account page.
